ELSEVIER

Composite Structures **29** (1994) 473–475
Elsevier Science Limited
Printed in Great Britain.

CONTENTS OF VOLUME 29

Number 1

1 On the numerical analysis of local effects in composite structures
F. GRUTTMANN & W. WAGNER (Germany)

13 Factors influencing nonlinear static response prediction and test-analysis correlation for composite panels
N. F. KNIGHT, JR (USA)

27 Nonlinear analysis of orthotropic beams of solid cross-sections
O. RAND (Israel)

47 Impact and post-impact behavior of foam core sandwich structures
G. CAPRINO & R. TETI (Italy)

57 Design of thick laminated composite plates for maximum damping
T. Y. KAM & R. R. CHANG (Taiwan)

69 A local high-order deformable theory for thick laminated cylindrical shells
C.-P. WU & C.-C. LIU (Taiwan)

89 On the linear and nonlinear analysis of cross-ply laminated composite plates
S. Y. LEE & J. J. OU (Taiwan)

99 Effect of matrix resin on the response in a centrally notched composite laminate
M.-H. R. JEN, Y. S. KAU & C. L. ONG (Taiwan)

107 An efficient static analysis of sandwich beams
N. S. BARDELL & G. J. GANGE (UK)

119 Parametric study of interfacial debonding in adhesively bonded composite joints
S. C. PRADHAN, N. G. R. IYENGAR & N. N. KISHORE (India)

Number 2

Special Issue: Computer Aided Mechanical Engineering of Composite Structures

127 Foreword

129 Preface

131 Three-dimensional static, dynamic, thermoelastic and buckling analysis of homogeneous and laminated composite cylinders
K. P. SOLDATOS & J.-Q. YE (UK)

145 Minimum weight and deflection design of thick sandwich laminates via symbolic computation
S. ADALI, E. B. SUMMERS & V. E. VERIJENKO (South Africa)

161 Geometrically nonlinear higher order theory of laminated plates and shells with shear and normal deformation
V. E. VERIJENKO (South Africa)

181 Aspects on design and analysis of composite structures in an integrated analysis environment
T. IREMAN, G. HOLMBERG & A. EDLUND (Sweden)

191 Evaluative eigen analysis of composite structures
A. MAHER (Egypt)

197 The buckling performance of composite stiffened panel structures subjected to combined in-plane compression and shear loading
J. LOUGHLAN (UK)

213 Non-linear finite element modelling of an integrally stiffened composite panel
M. L. SCOTT (Australia)

219 Finite element analysis of composite structures
J. WOOD (UK)

Number 3

231 Fiber–matrix interface—information from experiments via simulation
G. N. FRANTZISKONIS, P. KARPUR, T. E. MATIKAS, S. KRISHNAMURTHY & P. D. JERO (USA)

249 Free vibration of generally laminated composite plates with various edge support conditions
G. B. CHAI (Singapore)

259 Tailoring the dynamic characteristics of composite panels using fiber orientation
R. A. RAOUF (USA)

269 Optimal design of laminated plates and shells
S. ABRATE (USA)

287 Intraply crack and delamination interaction in laminate beams under transverse loading
Y.-B. SHI & A. F. YEE (USA)

299 Buckling of generally laminated composite plates with various edge support conditions
G. B. CHAI (Singapore)

311 Analysis of clamped laminated plates subjected to conventional blast
K. Y. LAM & L. CHUN (Singapore)

323 The effect of specimen length on the static behaviour of filament-wound pipes
K. L. ALDERSON & G. M. SIMPSON (UK)

329 A novel finite element investigation of the effects of washer friction in composite plates with bolt-filled holes
U. GRAHAM, M. R. WISNOM & J. P. H. WEBBER (UK)

341 Static and dynamic behaviour of a sandwich composite machine component
B. VÉDY & A. VENKATESH (Switzerland)

Number 4

349 The nonlinear response of unsymmetric multilayered plates using smeared laminate and layerwise models
U. ICARDI (Italy)

365 Uncoupled and coupled approaches to predict microcrack initiation in fiber reinforced ceramic matrix composites
F. HILD, P.-L. LARSSON & F. A. LECKIE (USA)

379 Characterization of delamination behavior of unidirectional graphite/PEEK laminates using cracked lap shear (CLS) specimens
K. Y. RHEE (Korea)

383 Effect of stretching–shearing coupling on instability-related delamination growth
B. D. DAVIDSON & C. H. FERRIE (USA)

393 Normal stress distribution adjacent to optimum holes in composite plates
R. RAMESH KUMAR, G. VENKATESWARA RAO & K. S. SURESH (India)

399 Free vibration of composite cylindrical polygonal ducts
H. P. LEE (Singapore)

405 Vibration of symmetrically laminated rectangular composite plates reinforced by intermediate stiffeners
H. P. LEE & T. Y. NG (Singapore)

415 Computation of ply thickness of laminated beam for which Euler–Bernoulli theory is adequate
A. BHIMARADDI (USA)

421 Bending and free vibration analysis of shear deformable laminated composite beams by finite element method
D. KR. MAITI & P. K. SINHA (India)

433 Large deflections and stability FEM analysis of shear deformable compressed anisotropic flat panels
E. CARRERA & M. VILLANI (Italy)

445 Consistent and variationally correct finite elements for higher-order laminated plate theory
P. RAMA MOHAN, B. P. NAGANARAYANA & G. PRATHAP (India)

457 Post-buckling finite element analysis of composite cylindrical panels in axial compression
M. GOLDMANIS & A. RIEKSTINSH (Latvia)

463 Characterization of the longitudinal tensile behavior of pultruded I-shape structural members using coupon specimens
Y. WANG & A.-H. ZUREICK (USA)
